PROFESSIONAL SUMMARY

Versatile Technical and General Virtual Assistant with a strong foundation in Full Stack Development and Software Quality Assurance. Adept at streamlining administrative tasks and business workflows by utilizing Google Workspace for scheduling, data management, and professional documentation. Expert at bridging the gap between complex technical operations and daily executive support through the integration of AI-powered automation and independent project ownership. Skilled in maintaining clear communication with non-technical stakeholders while handling diverse responsibilities including database maintenance, email automation, and digital organization. Dedicated to driving business efficiency through a disciplined work ethic, specialized virtual assistant training, and the ability to adapt quickly to new tools in remote work environments.

CORE SKILLS

Back-End: PHP (Laravel), C# (.NET MVC)

Front-End: JavaScript, Bootstrap, Sass, Flexbox, CSS Grid

Databases: MySQL, MariaDB, Supabase, Firebase, MongoDB Atlas

APIs & Integration: REST APIs (design, development, integration), Postman, OAuth 2.0, API authentication, JSON/XML data handling, Third-party integrations (Gmail, Anthropic, OpenAI, Google APIs), Webhook development

AI & Automation: AI-Powered Automation & Website Development (Claude Sonnet/Haiku, OpenAI GPT-4, Google Gemini), LLM Prompt Engineering, AI-Driven Solutions Architecture, AI Video & Image Automation (ElevenLabs, Suno, Hailuo AI, Whisk)

Desktop Development: C# Windows Forms Application (WFA)

Google Workspace: Google Calendar (scheduling, shared calendars, appointment slots), Google Sheets (formulas, data analysis, reporting), Google Drive (file management, sharing, organization), Google Docs (documentation).

Tools: Git, VS Code, Visual Studio, Postman (REST API), Asana, GitLab, MS Excel (Advanced), MS Word, MS PowerPoint

Dev Environment: Laragon, XAMPP

SOFT SKILLS

Communication & Collaboration: Clear written and verbal communication with technical and non-technical stakeholders, active listening, remote team collaboration, cross-functional coordination, client relationship management

Project & Time Management: Independent end-to-end project ownership, Agile/sprint workflows, deadline-driven delivery, multi-task prioritization, proactive problem identification and resolution

Adaptability & Problem Solving: Fast learner, resourceful under pressure, analytical thinking, creative solution design, ability to pivot quickly in dynamic environments

Professionalism & Work Ethic: High attention to detail, self-motivated and disciplined in remote settings, confidentiality and data privacy awareness, reliability, ownership mentality

Leadership & Initiative: Proactive contributor, mentoring through code reviews, stakeholder management, ability to work with minimal supervision, results-oriented mindset

WORK EXPERIENCE

Junior Programmer | HTECH Corporation

November 2022 – October 2023 • Alabang, Metro Manila

- Designed, developed, and tested Laravel-based web applications for 3+ client accounts, ensuring high performance and cross-platform responsiveness.
- Integrated automated testing frameworks that reduced bug reports and contributed to more stable, reliable software releases across multiple project cycles.
- Optimized existing codebase and delivered multiple major projects ahead of schedule, improving client satisfaction scores.
- Implemented RESTful API integrations using Postman (POST, PUT, DELETE), supporting seamless data communication between systems.
- Applied advanced database schema design (1:N, 1:1, N:M relationships) with proper use of primary and foreign keys for data integrity.
- Participated in Agile sprint planning and daily stand-ups, improving team communication and project delivery efficiency.
- Conducted code reviews and provided constructive feedback, raising overall code quality and maintainability.
- Managed project scheduling and progress tracking using Asana and GitLab.

System Developer | GRUPPOEMSCORP

June 2022 – October 2022 • Sta. Rosa, Laguna Science Park

- Built a C# .NET MVC web application supporting internal HR operations, including employee performance evaluation and attendance management modules.
- Implemented a QR code-based automated timekeeping system, improving attendance accuracy and eliminating manual processing time.
- Designed and developed vehicle and shuttle tracking systems, enhancing fleet monitoring and resource management.
- Integrated all developed applications with the company's central database, ensuring data consistency across departments.
- Collaborated with the Admin Department to gather requirements, analyze business needs, and deliver user-focused solutions.

Test Technician – Engineering | Western Digital (WD)

October 2020 – April 2022 • Sta. Rosa, Laguna Science Park

- Managed technical operations of Slider Fab machinery, ensuring peak performance through systematic inspections and 5S methodology.
- Resolved a critical machine failure within 2 weeks — significantly under the standard 4–6 week resolution timeline — enabling the facility to meet weekly production targets. The implemented fix became the standard countermeasure for recurring issues.
- Developed Excel macro-based tools to process complex machine performance data, identifying root causes of recurring failures and reducing downtime.
- Built an internal data visualization software (similar to the QA group's tool) capable of reading Excel data and rendering column charts — completed independently as a special project.
- Produced detailed data failure analysis reports using MS Excel for data mapping and MS Word for formal reporting.

Software Quality Assurance Tester | Conduent (Contractual via Protempus) / Western Digital

March – August 2018 • Mall of Asia, Pasay

- Executed comprehensive QA testing across multiple websites, verifying functionality, usability, and performance across diverse environments including Android and iOS.
- Developed standardized testing procedures in Microsoft Excel, streamlining website validation and maintaining quality control benchmarks.
- Evaluated UI/UX designs for usability and accessibility, and documented test results and strategic recommendations in professional QA reports.

FREELANCE PROJECTS

Construction Estimation Web Tool | Archivil-Plan

March 2026 – Present • Freelance • On-Hold

- Built a web-based construction estimation tool that converts uploaded floor plan images into measurable data using scatter-based mapping.
- Automated Bill of Quantities (BOQ) calculations for construction materials (cement, etc.), enabling organized Excel-based reporting.
- Designed a separated frontend/backend architecture for scalable, high-performance estimation workflows.

Inventory & Mini E-Commerce System | Streetwise PH

March 2026 • Freelance • End-Of-Contract

- Replaced manual handwritten records with a digital inventory system tracking stock levels and sales for a retail business.
- Integrated sales analysis features providing visibility into performance trends and customer behavior.
- Built an automatic invoice generator for buyers and sales reporting in Excel format.

PDF Batch Automation Tool | Liza De Vyra

February – March 2026 • Freelance • End-Of-Contract

- Engineered a high-performance client-side application (HTML/CSS/JS) supporting simultaneous import of up to 2,000 PDF files.
- Developed 3 extraction modes (Multiple Keywords, Single Keyword, Extract All) with Excel export functionality.
- Prioritized local browser processing to ensure complete data privacy with zero server-side data exposure.

Booking System | Victorias Haven Private Resort

March 2026 • Freelance • End-Of-Contract

- Replaced paper-based booking logs with a centralized, calendar-driven digital reservation system, eliminating double bookings and missed reservations.
- Developed a real-time availability tracking interface with automated booking conflict alerts, protecting revenue from scheduling gaps.
- Integrated an analytics module to track booking patterns, enabling data-driven decisions on dynamic pricing and seasonal availability.

Email Automation System | Victorias Haven Private Resort

February – March 2026 • Freelance • End-Of-Contract

- Engineered a centralized application to automate repetitive daily email communications, reducing task completion time from 10 minutes to 10 seconds.
- Developed a seamless mail-sending interface via API integration, eliminating manual browser-tab switching and direct Gmail logins.
- Programmed logic for automatic image and file attachment based on user selections, ensuring data accuracy and consistency.

EDUCATION

Bachelor of Science in Computer Science

De La Salle University – Dasmariñas | 2013 – 2018

CERTIFICATIONS & TRAINING

- The Modern Flexbox, Grid, Sass & Animations Developer Course (48.5 hrs) — Muslim Helalee | Udemy | Feb 10, 2026
- Vibe Coding Bootcamp: Build Any App, Game or Website with AI (4 hrs) — Ivan Lourenco Gomes | Udemy | Mar 9, 2026
- C# Intermediate: Classes, Interfaces and OOP (6 hrs) — Mosh Hamedani | Udemy | Jun 16, 2022
- C# Basics for Beginners: Learn C# Fundamentals by Coding (5.5 hrs) — Mosh Hamedani | Udemy | Jun 15, 2022
- GitHub Ultimate: Master Git and GitHub - Beginner to Expert (6.5 hrs) — Jason Taylor | Udemy | Jun 17, 2022
- Virtual Assistant Training VA101 V5 (11 hrs) & VA101 V6 (15 hrs) — YourVABuddy
